RE: Emergency Closure of Eastgate South Drive
Union Township

Dear Commissioners:

There was an Emergency closure of Eastgate South Drive in Union Township on Friday, September 25, 2009, due to repeated overflowing of the public road caused by the failure of a privately owned and maintained storm water system, and, as a result of weather conditions that cause the adjoining detention pond to overflow without warning, public safety dictates that the portion of the road that became inundated remain closed until the private system is restored to functionality.

The Clermont County Engineer's Office shall post and maintain all advisory signage in accordance with the attached recommended detour. This office shall also advise the Communication Center, Township Trustees, Fire & EMS, Schools, and other agencies.

If we can provide any additional information, please do not hesitate to contact us.

Sincerely,

Patrick J. Manger, P.E.-P.S.
County Engineer
